INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference FP030094	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/JP2003/005410	International filing date (day/month/year) 25 April 2003 (25.04.2003)	Priority date (day/month/year) 02 August 2002 (02.08.2002)
International Patent Classification (IPC) or national classification and IPC B66C 1/36		
Applicant KABUSHIKI KAISHA NIICHI		

- This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
- This REPORT consists of a total of 3 sheets, including this cover sheet.

☐ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).
These annexes consist of a total of _____ sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 25 April 2003 (25.04.2003)	Date of completion of this report 27 January 2004 (27.01.2004)
Name and mailing address of the IPEA/JP	Authorized officer
Facsimile No.	Telephone No.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International Application No.

PCT/JP2003/005410

I. Basis of the report

1. With regard to the elements of the international application:*

- ☒ the international application as originally filed
- ☐ the description:
 pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____
- ☐ the claims:
 pages _____, as originally filed
 pages _____, as amended (together with any statement under Article 19
 pages _____, filed with the demand
 pages _____, filed with the letter of _____
- ☐ the drawings:
 pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____
- ☐ the sequence listing part of the description:
 pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language _____ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/fig _____

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/JP03/05410

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-13	YES
	Claims		NO
Inventive step (IS)	Claims	4, 9	YES
	Claims	1-3, 5-8, 10-13	NO
Industrial applicability (IA)	Claims	1-13	YES
	Claims		NO

2. Citations and explanations

Claims 1-3, 5-8, 10-13

Document 1: Microfilm of the specification and drawings annexed to the written application of Japanese Utility Model Application No. 46454/1986 (Laid-open No. 173382/1987) (TAKAYOSHI NAKAJIMA, SHIN KISHITA), 04 November 1987 (04.11.87), full text, Figs. 1-8 (Family: none)

Document 2: JP, 3-416, Y1 (NGK INSULATORS, LTD.), 26 January 1928 (26.01.28), full text, Figs. 1-2 (Family: none)

Document 1 describes "a rope hanger comprising a main body having a hanging part that is essentially hook shaped for hanging rope, etc.; a slip-off preventive lever whose turning pivot part is turnably supported at a position outside the tip of the hanging part on the aforesaid main body and whose turning end part moves between a locked position that is closed between a position where it contacts the inside of the tip of the aforesaid hanging part and the tip of the hanging part and an open position where the turning end part is distanced from the hanging part's tip; and a spring for energizing and applying rotation force to the slip-off preventive lever to the locked position side."

Document 2 describes the point about "providing a spring that holds the slip-off preventive lever at a position in a state in which it can move laterally within a fixed range in the direction orthogonal to its turning direction and energizing the slip-off preventive lever toward the lock position that is at one end of this range, and providing a stopper means that prevents the slip-off preventive lever from turning to the open position side only when the slip-off preventive lever is at the lock position."

Employing the slip-off preventive lever's action mechanism of document 2 in the action mechanism of the slip-off preventive lever of the rope hanger of document 1 would be easy for a person skilled in the art.

The subject matter of claims 4 and 9 is not described in any of the documents cited in the ISR and appears to be non-obvious to a person skilled in the art.
